PROJECT DEVELOPMENT PHASE
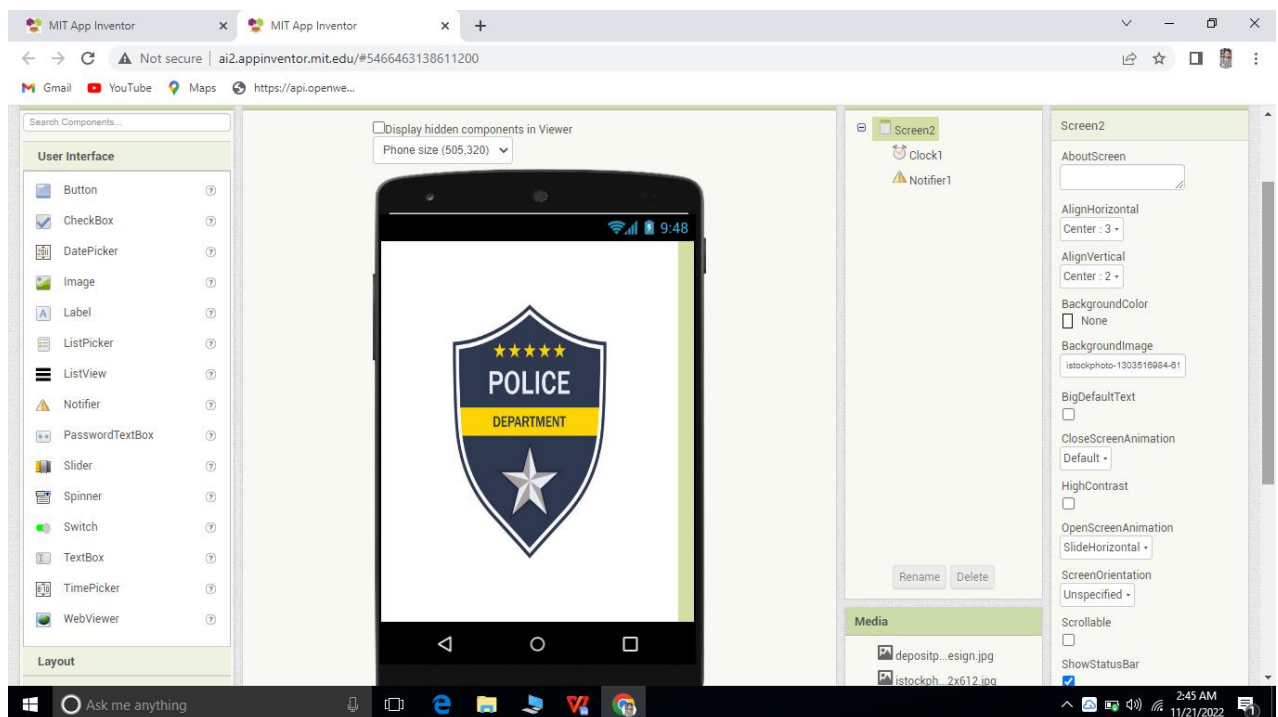

SPRINT – 2

*CREATION OF DASHBOARD FOR UI USING MIT APP INVENTOR.*

Details:

- This is the secondary page that pops up when the user logs into the app.
- This page consists of an alert (motion detected!) which is triggered by the connected IOT by the cloud.
- The authorities can understand that there is a vehicle parked in an no-parking area.

Dashboard for the user…

Backend of the dashboard...

Note: this app is now further linked to the cloud using the node-red and iot Watson website.
